

# Collaboration's Impact on Personal Success

08/21/2023

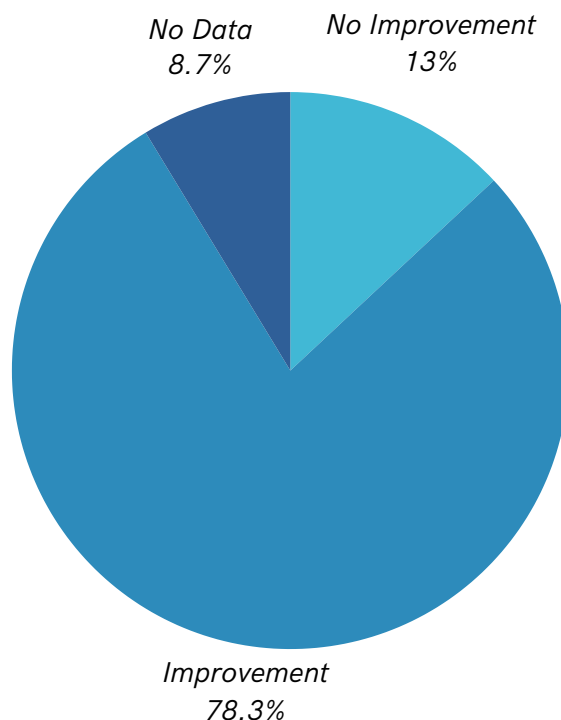

## Overview

This poster is an argument that states that collaboration has an important role on personal success. This is demonstrated through data collected from a NASA moon landing worksheet completed by everyone in the class individually and then in small groups. The accuracy improved drastically from individual to group work

## Average Accuracy Change

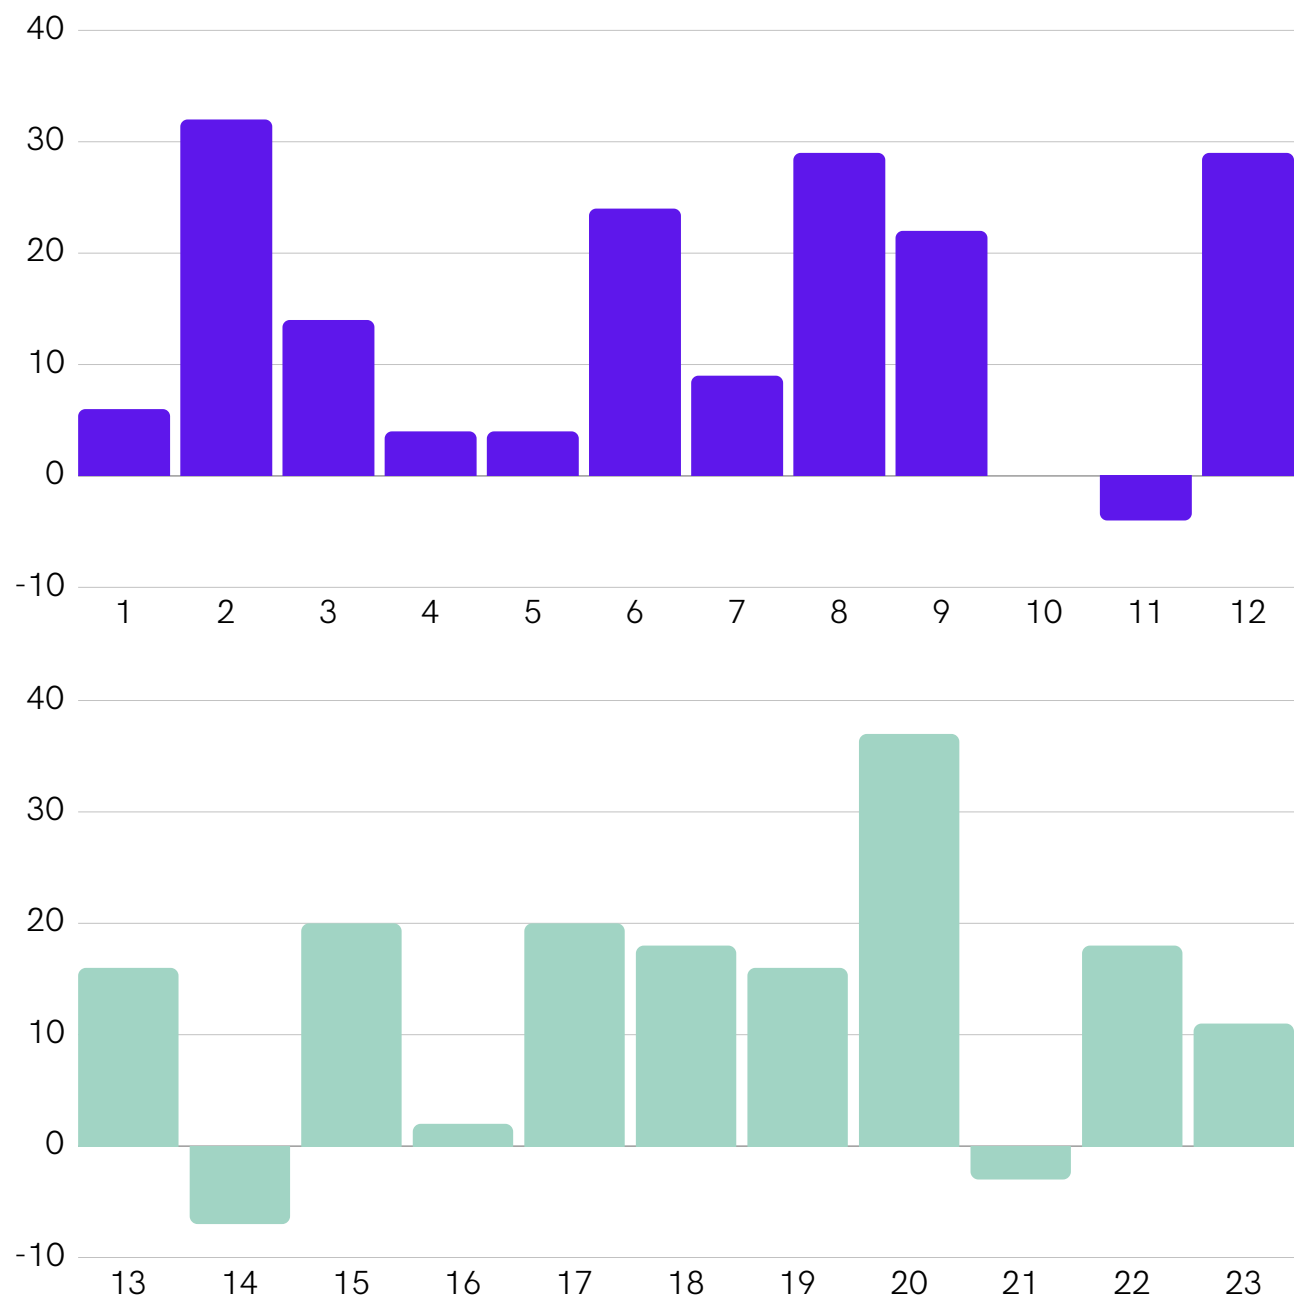

The percentage of change in students average accuracy in NASA worksheet

## Classroom Data

## Quantitative Results

Points of Accuracy Increase in Students Scores

## Conclusion

- The majority of people’s accuracy improved with only 3 out of 23 student’s accuracy decreasing.
- The average individual score was a 40.7 and the average group score was 26.8 almost a 14 point increase in accuracy.
- This shows that collaboration has an important role on personal success because most people increased.
